## Keeping those specs on!

---

Hello All,

I just wanted to share an idea my wife had for keeping spectacles on my daughter. She wears a hard frame with springy ends on the ears and initially the arms were just too long. One day Catherine put a ribbon on, and wrapped it round the arms, behind her ears. It was a great idea, and has worked very well. It doesn't stop her trying to yank them off when she's frustrated, and we have been through three pairs in a year, but we feel that's acceptable, since the glasses suit her well, and seem to do a very good job, as you can hopefully see!

Regards,

Tim. [http://babieswithglasses.org/components/com\\_fireboard/uploaded/images/z.jpg](http://babieswithglasses.org/components/com_fireboard/uploaded/images/z.jpg)
